

DEFICIENCY CORRECTION AND PREVENTION

TRUE PLANT SCIENCE

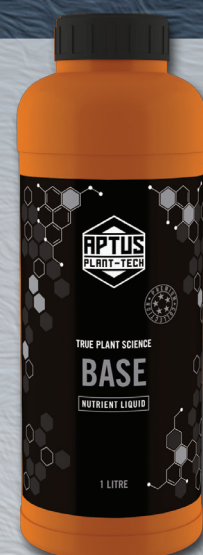

FASILITOR NUTRITION MANAGER, ANTI-STRESS PLANT ENHANCER

- Regulates uptake of nutrients
- Strengthens plant structure
- Increases plant resistance to stress (abiotic and biotic)
- Source of plant-available Boron

FINALEBOOST SULFUR, MATURATION BOOSTER

- Vital component of essential plant proteins
- Crucial to the utilisation of Nitrogen within the plant
- Essential component to the formation of plant-based oils

BASE NUTRIENT LIQUID, MN, ZN,

- Proper internodal spacing occurs with optimal levels of Zn.
- Zn allows for the manufacture of natural growth hormones for healthy plant development
- Healthy formation of roots occurs with optimal levels of Mn

MASSBOOST BUD BOOSTER

- Source of amino chelated magnesium
- Central atom in the chlorophyll molecule necessary for photosynthesis
- Activates essential plant enzymes

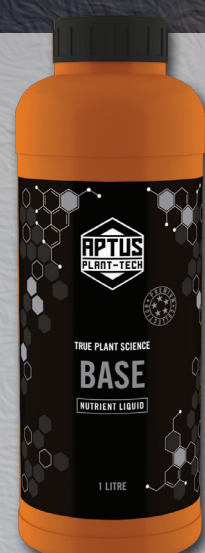

PEAKBOOST PHOSPHORUS BOOSTER

- Essential to the healthy development and initial setting of flowers and fruits
- Stimulates the production of proteins, plant hormones and vitamins
- Improves root development

MASSBOOST BUD BOOSTER

- Source of highly available, amino-chelated calcium
- Enables the healthy formation of new leaves, stems, fruits and flowers
- Prevents distortion of growth
- Improves firmness and quality of flower and fruit

BASE NUTRIENT LIQUID, FE

- Essential to the processes of chlorophyll synthesis
- Prevents chlorosis, lack of chlorophyll and subsequent yellowing
- Crucial to a wide variety of biological processes necessary for the formation of enzymes
- Essential for D.N.A synthesis

FASILITOR NUTRITION MANAGER, ANTI-STRESS PLANT ENHANCER

- Regulates uptake of nutrients
- Necessary for the synthesis of nitrates into crucial amino acids
- Converts inorganic phosphorus into organic forms within the plant
- Stimulates nitrogenase activity

FINALEBOOST MATURATION BOOSTER

- Source of abundant chelated potassium for large, dense flowers
- Regulates CO₂ intake essential for photosynthesis
- Necessary for the activation of growth-related enzymes within the plant

STARTBOOST NITROGEN BOOSTER

- Primary source of nitrogen in the vegetative phase of growth
- Essential to the formation of chlorophyll and photosynthesis
- Building blocks of essential amino acids and proteins

BASEBOOST 100% ORGANIC NUTRIENT PELLETS

- Provides complete organic nutrition
- Slow-release effect for up to 10-12 weeks

Soil life friendly!

AMINO ACIDS

CARBON

Micro-life

S

Ca

Mg

K

STARTBOOST ROOT ZONE CONDITIONER

- Contains humic acid, a natural source of carbon and organic molecules optimal for soil structure
- Natural chelation agent increasing mineral availability
- Source of L-amino acids and protein development

ECOZEN ENZYME BOOSTER AND MICRO LIFE STIMULATOR

- Source of carbohydrates to feed soil bacteria population
- Contains enzymes that digest organic matter, cleaning the plant medium.
- Breaks down salt deposits increasing mineral availability
