

INVASION OSA

Orthosilicic Acid

FOR OUT OF THIS WORLD RESULTS

Space Age Silica - Activate your INVASION OSA by mixing it with water to produce Monosilicic Acid - the ultimate readily absorbable silicon. INVASION OSA is a crucial element for powerful plant development.

Benefits of using INVASION OSA

- Suitable for all plant types
- Improves crop growth and vigor
- Increased pest and disease resistance
- Larger leaf and flower size (improving yield and potency)

Application

Works with all cultivation systems and plants

- 1 - For OSA activation, mix with fresh water in a separate container before adding to reservoir.
- 2 - Pour activated OSA mixture into reservoir prior to adding any nutrient or additives.

Dosage

- Basic – 2 ml per 10L of nutrient solution
- Bloom: Slow vertical growth increase to 3 – 4ml per 10L in week 2 for one week only
- Foliar application: Use a maximum of 1ml per 1L of Foliar Spray
- Clone application: Foliar at 0.5ml per 1L
- Heavy feeding strains: 3ml per 10L

Warning: Keep out of reach of children
Not for internal use

Available in 250ml, 1L & 5L

Recommended feed guide

GROW PER 10L					BLOOM PER 10L							
CLONES	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 1	WEEK 2	WEEK 3	WEEK 4	WEEK 5	WEEK 6	WEEK 7	WEEK 8
0.5ML	1.5ML	2ML	2ML	2ML	2ML	3ML	2ML	2ML	2ML	2ML	2ML	-

Can be successfully used alongside any existing nutrient regime
